efire GROUP

— Since 1872 —

Aeronautic industry partner for more than 30 years

Efire is a French family group specializing in **sealing, precision cutting, protection and transfer of fluids.**

We design and manufacture high performance and reliable technical solutions for the aeronautic industry.

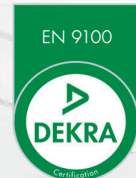

We are **certified EN 9100** and **qualified «genre 6» by Airbus Helicopters** and we master the standards and regulations related to the aeronautic sector.

Support from our experts at all steps of your project:

- Analysis of the specifications
- Recommendation of technical solutions
- Design and methods office
- Prototype and series

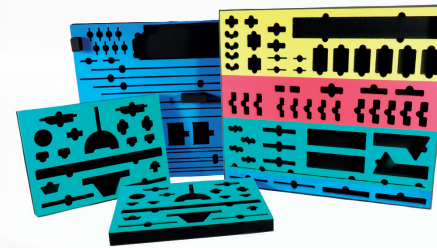

10 production sites
in France

Foam cutting

lean manufacturing, 5S, FOD

Foam cutting

Waterproof case

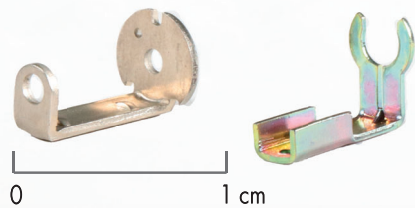

Foam cutting for roller cabinet

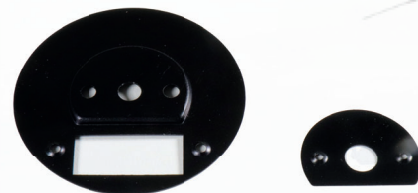

Mechanical elements

relays, contactors, component gap adjustment

Stamped parts for contactors

Stamped parts for instrument dials

Metallic and PET laminated shims

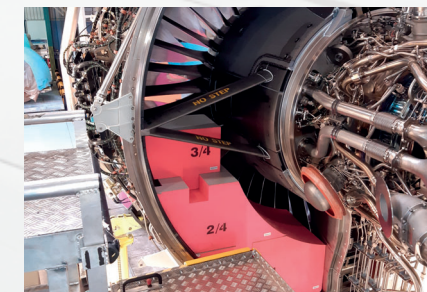

Anti-shock protections

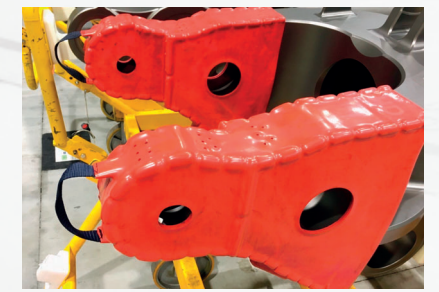

aircraft structures, people

Protection for reactor

Stool for reactor

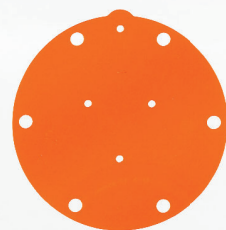

PVC dipping protection
on landing gear A350 - B787

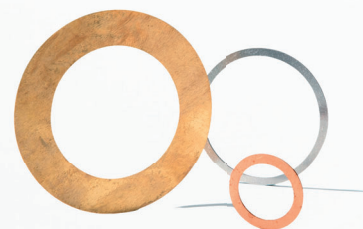

Sealing elements

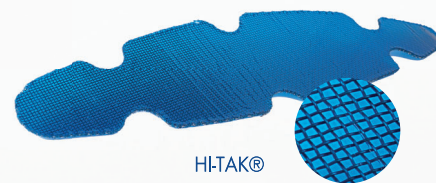

dashboards, fluids/air equipments...

Kapton® gasket
for compressor

Metal gaskets
for cockpit instrumentation

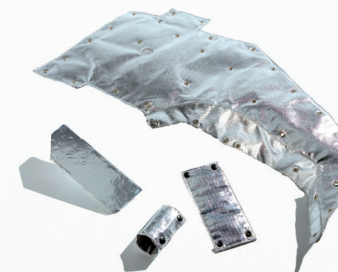

Conductive
polyurethane gel gasket

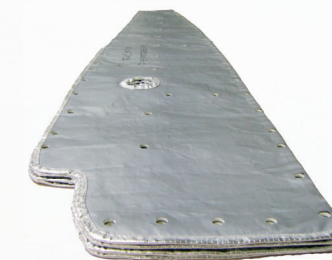

Thermal protection

helicopter turbines, aircraft cabins

Thermal protection

Thermal protection
for helicopter turbine

Thermal protection
for hose
